

Announcement from Enagic Osaka Factory

We truly appreciate your continued support to our products.

We really apologize for our insufficient supply of Leveluk Jr II that has been causing an inconvenience to many customers and distributors.

Having greatly increased our production capacity to supply more units of Leveluk Jr II, we will settle all of Jr II backorders during the 2A Speedy Achievement Campaign period in January and the rest will be settled in the first half of February.

Rest assured.

We will move forward and try to be a lifetime reliable partner of Enagic distributors.

We really appreciate your understanding and cooperation.
